# How to organize and share activities in ChooseIt! Maker:

1. Go to www.helpkidzlearn.com and click on the ChooseIt Maker box.

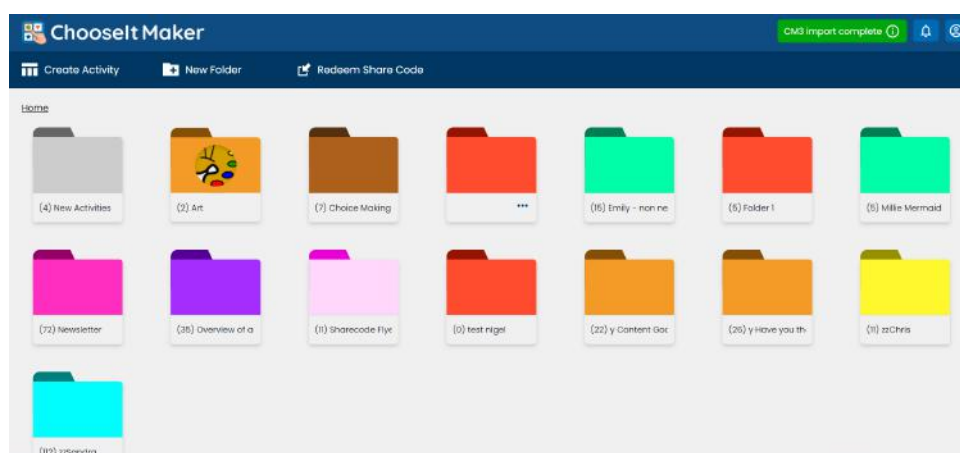

2. Click the green login button.

3. Enter the username and password access details. (This is the one that is NOT an email address. The email address is used by the administrator to manage the subscription; the non email address is used to login to ChooseIt Maker to play, create, and organize activities).
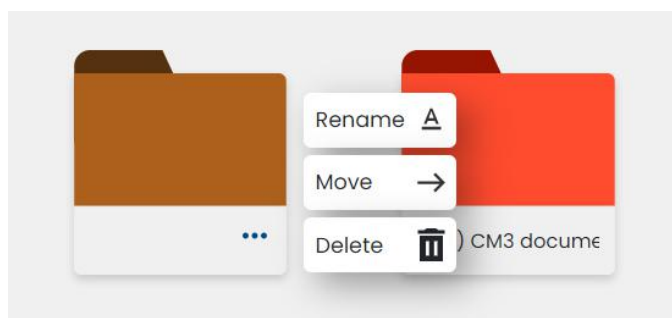

How to organize and share activities in ChooseIt! Maker (continued):

4. Your ChooseIt Maker activities are organized into folders on your home screen. You might choose to arrange your activities into folders by subject area (ex. math, science, literacy), learning goals (ex. cause and effect, errorless choices, errored choices), student name (ex. Angela, William, Antonio, etc.), or whatever way works best for you. Click on a folder to open it.

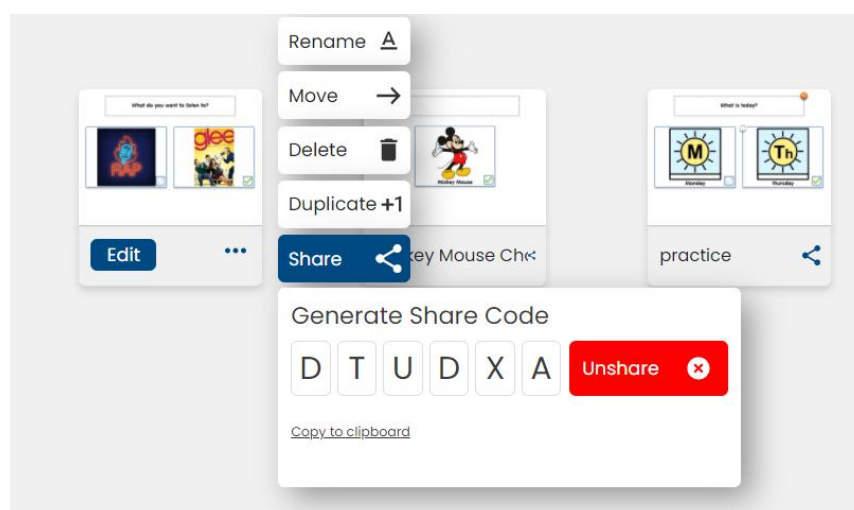

5. Scroll over a folder name and three dots will appear on the right side. Click the dots and three options will appear to rename the folder, move into to a different folder, or delete the folder.

6. Click on a folder to open it. Activities in a folder are arranged alphabetically.

How to organize and share activities in ChooseIt! Maker (continued):

7. Scroll over an activity name and three dots will appear on the right side. Click the dots and 5 options will appear to rename the activity, move it to a different folder, delete the activity, duplicate the activity, or share the activity. Sharing an activity will generate a 6 digit sharecode which you can give to any other ChooseIt Maker subscriber to download and play themselves (see #10 for how to redeem a sharecode).

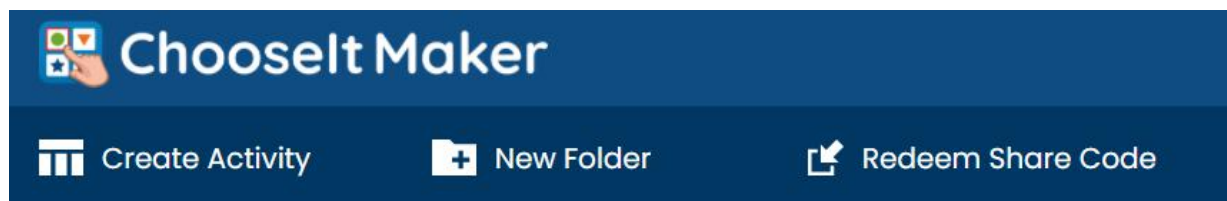

8. Scrolling over the name of an activity will also make an edit button appear. Click this to open the activity editor and make changes to your activity.

9. Click the upper portion of a thumbnail to open and play that activity.

How to organize and share activities in ChooseIt! Maker (continued):

10. In the upper left corner of the home and folder screens, there are 3 options: create activity, new folder, and redeem sharecode.

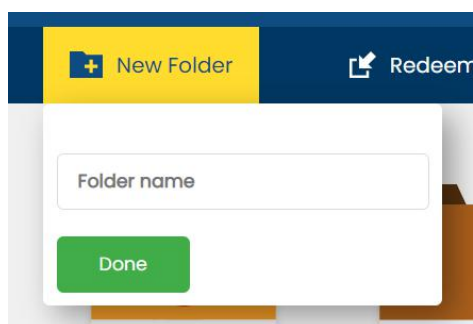

Create Activity

To create a new activity, click the Create Activity button to open the activity editor.

New Folder

To create a new folder, click the New Folder button then enter a name for the new folder.

Redeem Share Code

To download a new activity using a share code, click the Redeem Share Code button. Enter the unique 6 digit sharecode for the activity and use the drop down menu to select a folder location to store the activity.

11. To end a session, click the icon of the person in the top right of the screen, then click sign out. (Remembering to sign out will help avoid problems with logging in due to too many seats in use).

* ChooseIt Maker activities can also be played directly on your iPad through a web browser. Open ChooseIt Maker in a web browser and login to see all of your folders and activities displayed. Click on an activity to open the access settings, select your access setting, then play the activity just as you would on the computer.   For more information about some of these
